

## The role

We are looking for a UI developer to join our expanding product development team and help us deliver slick websites. This is an exciting opportunity to join a growing team and contribute to the successful delivery of solutions. This role offers plenty of opportunity for personal development and would be ideal for an individual looking to gain exposure to working with large solutions built using the latest technologies.

As a member of the product development team the successful candidate will be responsible for contributing to the development of our client facing website. Tasks will vary in scope and scale from enhancements to existing pages through to creation of rich new sections. You will be responsible for full stack development from the database through to the page, with the bulk of the development expected to be in the page.

The successful candidate must have a positive attitude, be passionate about development and take pride in what they produce.

Salary band: £22-27k depending on experience.

## Skills / Traits

- Experience of developing cross browser and device responsive web sites
- Experience of working collaboratively in a team environment
